LightCam1020

World's first auto night vision HD webcam

Genius introduces its latest unique webcam, LightCam 1020, the world's first HD webcam with a built-in auto night vision function. It's auto LED design lets you chat or videoconference anywhere, no matter the light condition. When under low light or a dim environment, the LightCam 1020 LED will turn on automatically to provide you a light source. In addition, the HD 720P resolution up to 30 fps provides excellent video quality.

It has a unique clip design with a 360 degrees rotation and tilts up and down 90 degrees. You can freely adjust LightCam 1020 to whatever angle you want. LightCam 1020 also has a built-in microphone that provides clear audio during any skype or videoconference session. Have fun using the bundled software, Arcsoft Companion 4 to capture, edit and share videos/photos when using the LightCam.
